Compensation Plan

The RINGANA compensation plan regulates the calculation of commission. It consists of 10 Target Levels — from the lowest Target Level 1 rising to the highest Target Level 10. The amount of monthly commission received depends on the Target Level as well as on the number of points achieved through the customer turnover and the team turnover.

● COLLECTING POINTS

RINGANA products are assigned a specific point value.* You can find the current point value for each product in the online shop at ringana.us, either directly on the product detail page or in your shopping cart.** Both you and your team's points are the basis for calculating your commission and form your corresponding direct and team turnover figures.

● TARGET LEVEL QUALIFICATION

Depending on the Target Level, different commission parameters determine your qualification. Up to Target Level 3, your Direct Turnover (DT) counts – either on its own or in combination with your Team Turnover (TT) or Team Turnover variant TT-1. From Target Level 4 onwards, a combination of Customer Turnover (CT) and the relevant Team Turnover variant TT-1, TT-2 or TT-3, is decisive. Find out what each of these means below.

● DIRECT TURNOVER (DT)

The Direct Turnover (DT) is the sum of all points generated directly by you within a statement month through successful recommendations and paid** sales of products. It is made up of two components: Your Customer Turnover (CT) and your Personal Turnover (PT).

● CUSTOMER TURNOVER (CT)

The Customer Turnover (CT) is the sum of all points generated within a statement month through successful recommendations and paid sales of products to your customers. It does not include your own purchases.

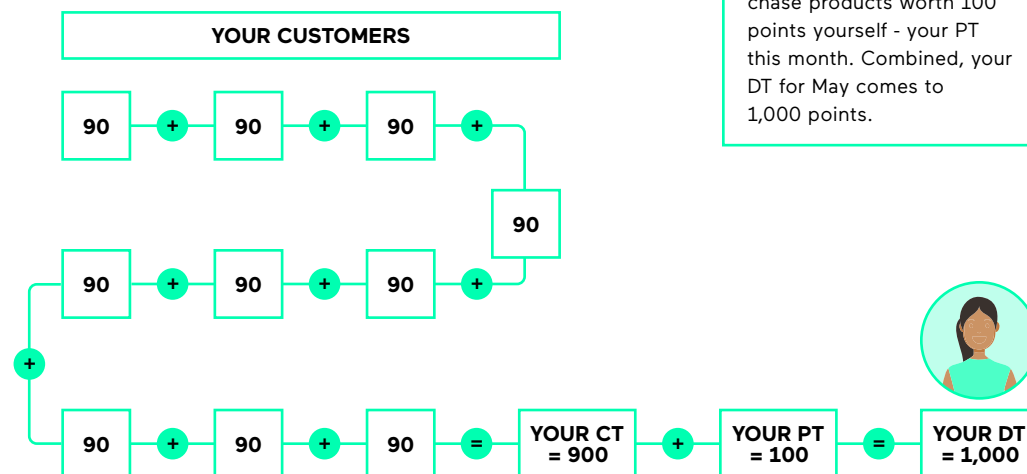

● THE PERSONAL TURNOVER (PT)

The Personal Turnover (PT) is the sum of all points generated within a statement month through your own paid purchases of products. It does not include any sales generated by your customers.

Example: DT, CT & PT

In May, ten of your customers place orders directly with RINGANA. Their paid purchase add up to a CT of 900 points. You also purchase products worth 100 points yourself - your PT this month. Combined, your DT for May comes to 1,000 points.

* For promotional products, the points value is adjusted proportionally to the reduced sales price. This means that the respective discount amount is deducted from the points value according to the points table. Subsequently, 90% of the points calculated in this way are taken into account for commission calculation. In this way, we ensure fair and balanced remuneration while maintaining the attractiveness of our promotions.

Please note that some products, such as merchandise and digital vouchers, are not subject to commission. As such, these products are not assigned a corresponding points value.

** Point values are visible only to logged-in RINGANA Partners, not to customers.

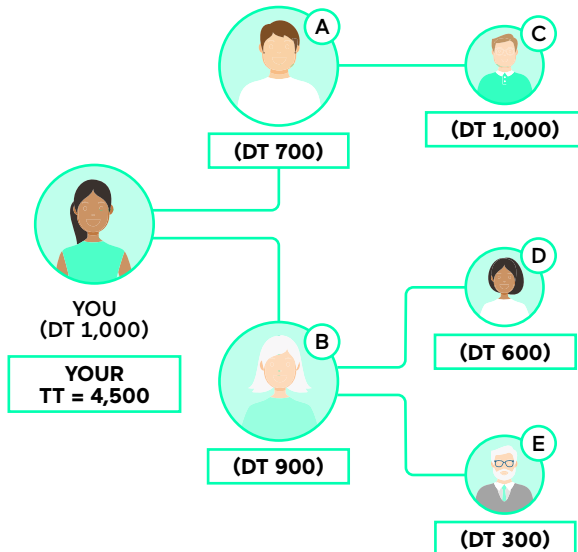

● TEAM TURNOVER (TT)

If you have managed to build a team, the team turnover is also taken into account for Target Level qualification. It is calculated from your own Direct Turnover plus the total Direct Turnover of all your team members. And the best thing is: All generations of your **downline** are fully included – without any restrictions.

RINGANA GLOSSARY

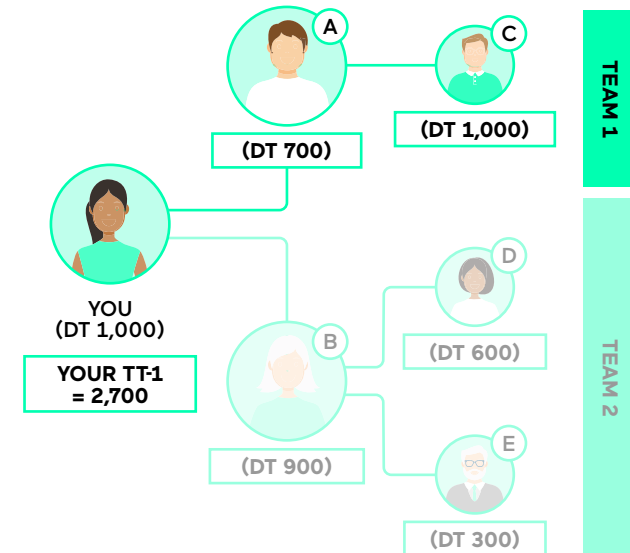

DOWNLINE

Every RINGANA partner below one's own position.

From Target Level 3 onwards, one of the following Team Turnover variants is relevant for qualification. Each is derived from your total Team Turnover by subtracting the turnover of your strongest performing team(s).

- TT-1 equals your TT minus the DT of your strongest team.
- TT-2 equals your TT minus the DT of your two strongest teams.
- TT-3 equals your TT minus the DT of your three strongest teams.

Example: TT-1 (team turnover-1)

1,000 (your own DT) +
1,700 (Team 1: A+ C) =
2,700. Team 2, the strongest team, is not included in the TT-1 calculation.

Generating commission

The Target Level that you qualify for determines how your commission is calculated in the next step. You will receive a certain percentage of your direct turnover and the direct turnover of your teams depending on your Target Level.

● DIRECT TURNOVER COMMISSION (DT COMMISSION)

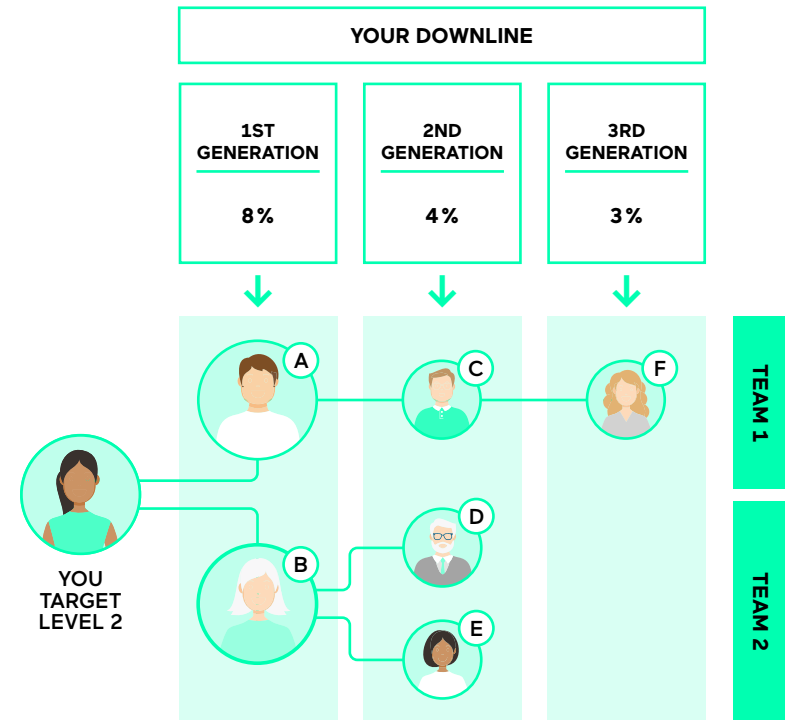

The DT commission is calculated by multiplying the points you have earned through the successful recommendation and paid sale of products within a statement month (= direct turnover or DT) by the designated DT commission rate of the respective Target Level. The DT commission is 19% of your DT in Target Level 1, 29% in Target Level 2 and 39% from Target Level 3.

● TEAM TURNOVER COMMISSION (TT COMMISSION)

The team turnover commission is calculated by multiplying the direct turnover of your team partners by the assigned percentage of the respective generation. The higher your own Target Level, the more generations are taken into account when calculating your commission.

Maximum commission points for the strongest team

Depending on the Target Level achieved, the maximum points listed in the compensation plan will be used to calculate your commission for your strongest team after calculating the percentage.

Example: Team

In the example given, you recruited A and B to become RINGANA partners. C was recruited by A, D and E were recruited by B, F was recruited by C and so on. You, together with A, B, C, D, E and F form your team. In other words: Your team is made up of the partners you acquired in generation 1 and their teams in the following generations — in this case team 1 and team 2.

DT commission	DT in points × DT-commission rate (depending on the Target Level reached)
+ TT commission	Sum of the DT (in points) of your individual team partners (max. up to generation 9) × percentage of the respective generation
= Total of all points	Basis for commission conversion
× defined points factor	1.6*
= Basic commission in local currency	

● CALCULATING COMMISSION BASED ON DIRECT TURNOVER

[illegible]

DT commission	
1,000 × 39 %	= 390 points
× points factor 1.6*	
Commission	\$ 624

14

● CALCULATING COMMISSION BASED ON TEAM TURNOVER

Not only have you successfully recommended RINGANA products, you have also decided to build a team. You value mutual support and team spirit. As such, in addition to your own DT, the DT of your team partners will now also be taken into account. For this purpose, the DT of your team partners will be multiplied by the percentage of the respective generation. The number of generations taken into account depends on the Target Level you have reached.

In the example set out above, you achieve a DT of 1,000 and a TT-1 of 2,700 (the turnover of Team 2 as the strongest team has been deducted). You have qualified for Target Level 3 thanks to both your own DT and TT-1. You will therefore receive direct turnover commission of 39% and team turnover commission at the specific percentages up to the fourth generation. The above example results in the following calculation:

DT commission

$$1,000 \text{ (your DT)} \times 39\% = 390 \text{ points}$$

TT commission

$$+ 1\text{st Generation: } 700 \times 8\% + 900 \times 8\% = 128 \text{ points}$$

$$+ 2\text{nd Generation: } 1,000 \times 9\% + 600 \times 9\% + 300 \times 9\% = 171 \text{ points}$$

Total

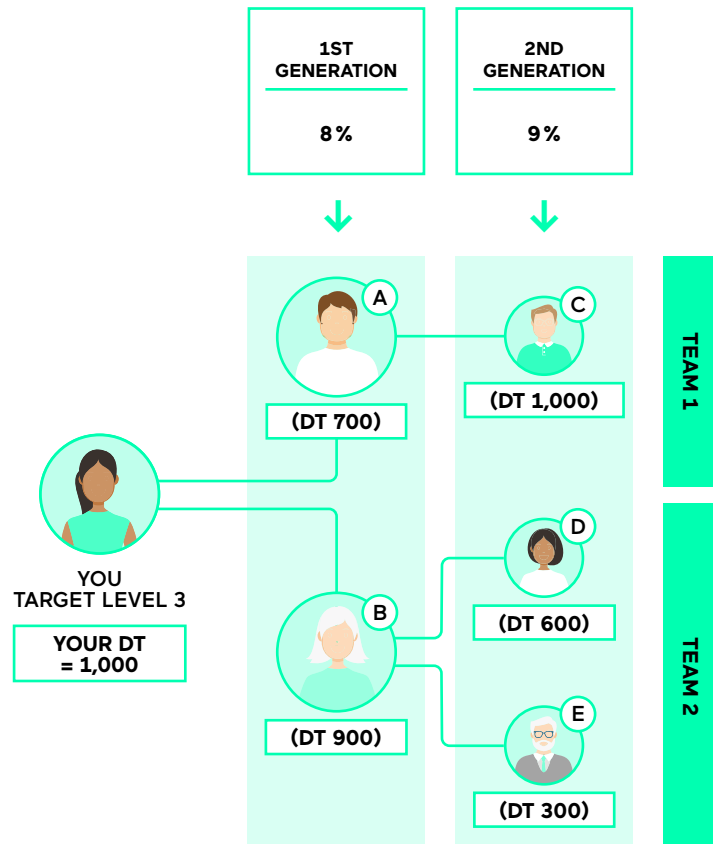

$$\times \text{points factor } 1.6^*$$

$$= 689 \text{ points}$$

Total commission

$$= \$ 1,102.4$$

* Please note that the points factor may vary from country to country.

Top-up bonuses for high performance

The RINGANA compensation plan offers you a great opportunity to earn attractive commission every month by recommending RINGANA products and building your business. But that's not all: with our top-up bonuses, you can secure additional income over and above your commission in line with the RINGANA compensation plan, because outstanding performance and exceptional growth are also rewarded at RINGANA.

Depending on where you are in your journey with RINGANA, you'll be supported by various bonus programmes. The Start Bonus supports you in laying a solid foundation for

your business at the start of your partnership. The Growth Bonus accompanies you from Target Level 6 — when it comes to continuously developing your team and growing together. And finally, the Beyond Target 10 Bonus rewards you if you succeed in surpassing yourself even after reaching Target Level 10.

The Performance Indicator helps you to keep track of all bonus achievements and monitor your performance at all times during your partnership.

→ RINGANA.US

**You will find your Performance Indicator in your Online-Office.
As a mentor, you can also view the performance of your team.
This allows you to support your team in taking full advantage of all the benefits.**

● START BONUS

The Start Bonus is a special bonus programme for all new RINGANA partners who have opted for the Starter set Business Booster.* The bonus supports those who work continuously on building their business right from the start and is paid out in the

form of a fixed monthly amount in addition to the commission. To qualify for the bonus, you must fulfil at least the following criteria in relation to your Target Level and the number of direct, active partners in the first 4 months of your partnership:

Statement month	1	2	3	4
Target Level	1	2	3	4
Number of personal, active Partners	0	0	1	2

* The Start Bonus is only valid for partners who register as RINGANA partners for the first time in conjunction with the Starter set Business Booster. Returning partners cannot qualify for the bonus.

** Active partners are those who reach at least Target Level 1 (110 DT points) within the respective statement month.

RINGANA BONUS PROGRAMMES

FROM TARGET LEVEL 1 START BONUS

Bonus programme for all new partners with the Business Booster starter set in the first 4 statement months of the partnership

FROM TARGET LEVEL 6 GROWTH BONUS

Bonus for all RINGANA partners who place a special focus on the growth of their team

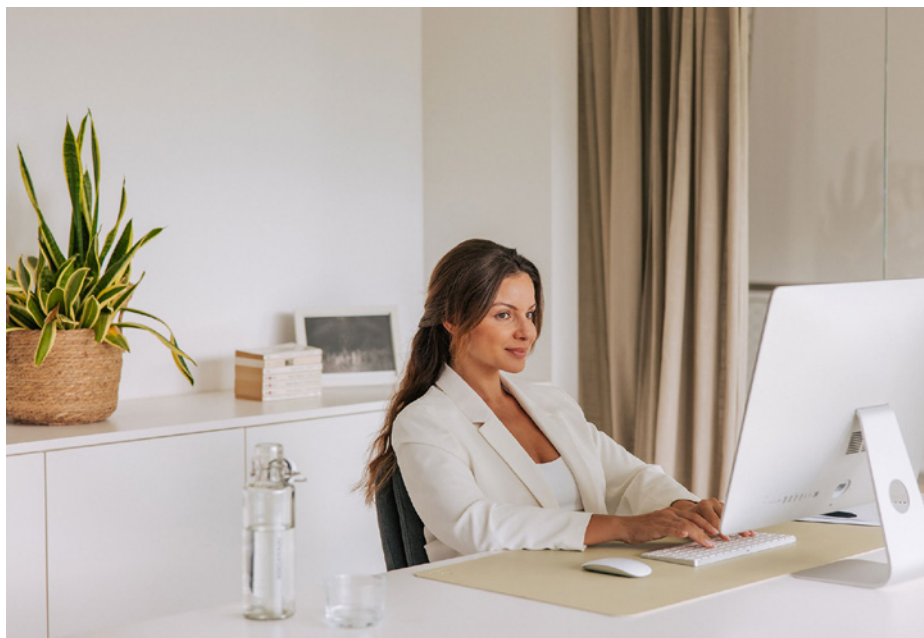

FROM TARGET LEVEL 10 BEYOND TARGET 10 BONUS

Bonus for all RINGANA partners who have already reached the highest level of the RINGANA compensation plan and who continue to surpass themselves

If you manage to fulfil the minimum criteria for one statement month, you will receive the

Start Bonus as a top-up to your regular commission. The bonus is calculated as follows:

Target Level		Number of personal, active Partners	US Dollars (\$)
2	+	0	110
3	+	1	220
4	+	2	2,200

If you have already reached a higher Target Level and a higher number of active partners than planned for the statement month you are currently in, you will also be paid a higher bonus according to the table. However, you must always satisfy both criteria. If you do not manage to fulfil both minimum criteria in one month during the first four statement months of your partnership, you will be excluded from the Start Bonus programme.

Partners therefore remain in the Start Bonus programme until:

- They fail to fulfil the criteria for the respective month.
- The Start Bonus programme ends automatically after the fourth statement month.

BILLING MONTHS	Month 1		Month 2	Month 3	Month 4
	May	June	July	August	September
DIRECT ACTIVE PARTNERS (AT LEAST TL1)			Partner A		Partner A
					Partner B*
	0		0	1	2
TARGET LEVEL	1		2	3	4
TOP-UP BONUS			\$ 110	\$ 220	\$ 2,200

*Returning partner

To fulfill the qualification criteria regarding the number of active partners, it is important to note the time at which you acquire your own partners. New partners are only billed for the first time after their first fully completed statement month (for further information, see page 29)*. Their activity status (at least 110 DT points) can only be determined when billing takes place for this first time.

New partners can therefore never be counted as direct active partners for the Start Bonus qualification criteria in the statement month in which you initially acquire them, but only in the following statement month in which they are billed for the first time. So, for example, in order to fulfill the Start Bonus qualification criteria of a direct active RINGANA partner in your team in your third statement month, you must acquire this partner during your second statement month. This is because this partner will only be billed for the first time with your third statement month, and they can be counted as an active partner if DT of at least 110 points has been achieved.

* Please note that returning partners are excluded from this. They are billed directly in the statement month in which they rejoin as a RINGANA partner.

● **START BONUS**
Example calculation

In your first statement month, you reach Target Level 1. This keeps you successfully in the Start Bonus Program and gives you the opportunity to earn attractive bonuses in the following months in addition to your commission.

In the second month of your partnership, you successfully further develop your business and attain Target Level 3, and you already have one direct, active RINGANA partner in your team. This outstanding success means that you exceed the minimum requirements for the second statement month in both criteria and you therefore receive a \$ 220 cash bonus in addition to your regular commission. In the third month you succeed in maintaining this level and therefore receive another \$ 220 Start Bonus.

In the following month, you continue to increase your Target Level, but unfortunately you do not manage to recruit any more active partners for your team. With Target Level 4 and one direct active partner, you fail to meet the minimum requirements for month 4 and are eliminated from the Start Bonus programme.

Statement month	1	2	3	4
Target Level reached	1/1	3/2	3/3	4/4
Number of personal, active Partners	0/0	1/0	1/1	1/2
Top-Up Bonus		\$ 220	\$ 220	\$ 0 (OUT)

● GROWTH BONUS

RINGANA partners at Target Level 6 and above are rewarded for their continuous team building with an additional bonus: the Growth Bonus. It is another form of remuneration for all partners who focus particularly strongly on the growth of their team.

The basis for growth is your **new partner volume (NPV)**. The qualification criteria for the Growth Bonus are a combination of your Target Level and your generated NPV-2 (3Gen) or NPV-3 (3Gen).

NPV-2 (3GEN) AND NPV-3 (3GEN) CALCULATION

The NPV-2 (3Gen) is the sum of your own NPV plus the NPV of your team partners minus your two strongest teams when it comes to NPV. The first three generations are used for the calculation.

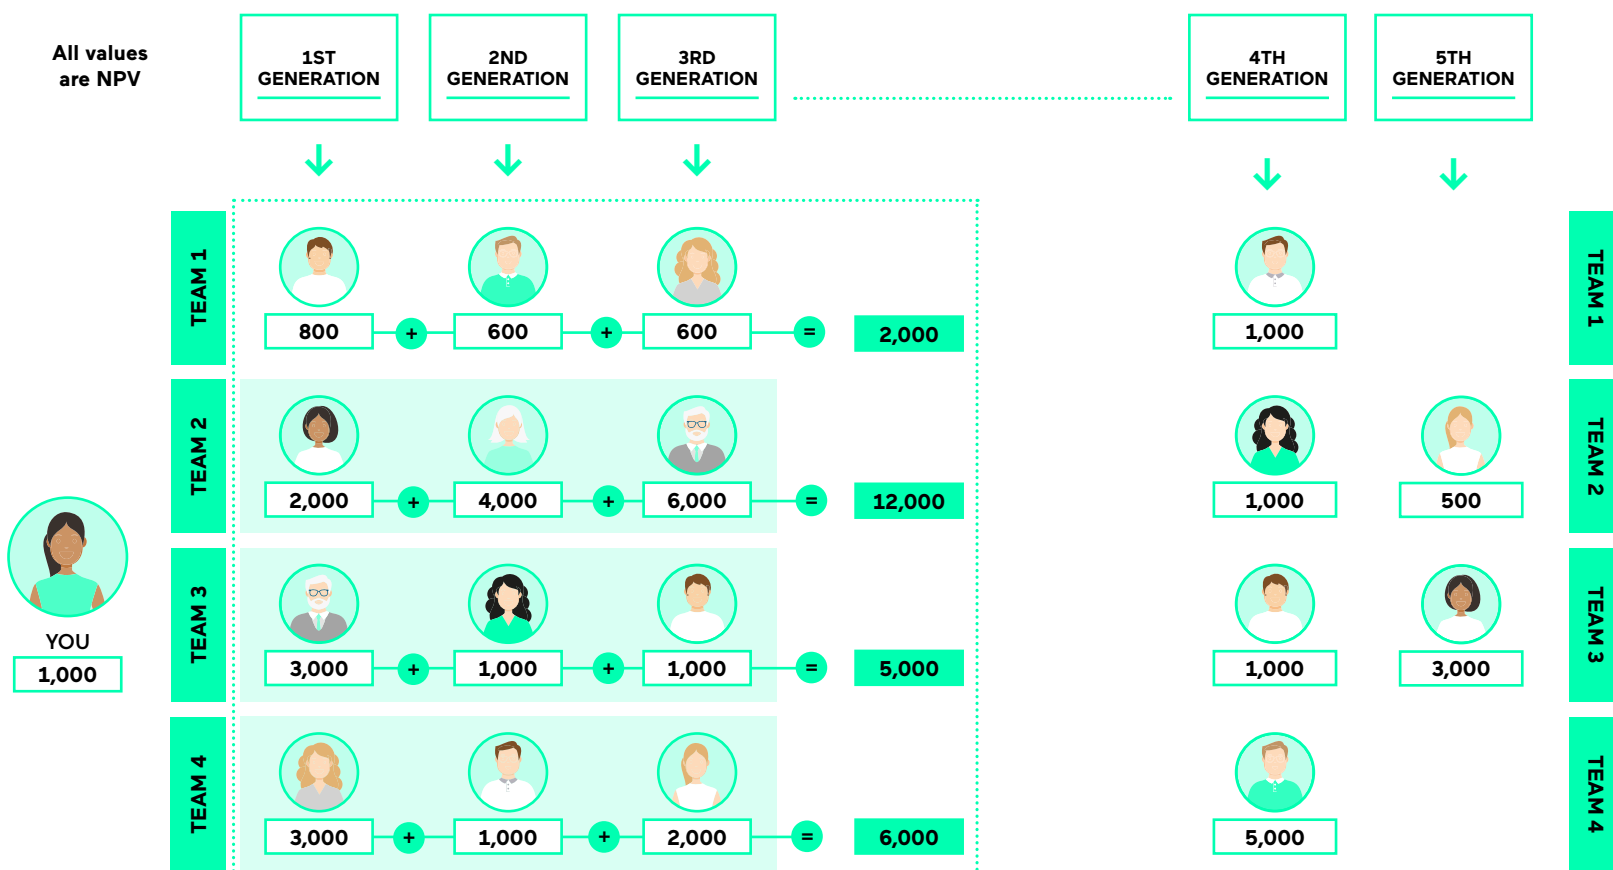

The NPV-3 (3Gen) is the sum of your own NPV plus the NPV of your team partners minus your three strongest teams when it comes to NPV. The first three generations are used for the calculation.

RINGANA GLOSSARY

NEW PARTNER VOLUME

The NPV corresponds to the cumulative direct turnover of your direct new partners in their first three statement months after registering as a RINGANA partner. New partners are those individuals who register as RINGANA partners for the first time and count towards the value calculation as soon as they are billed*.

* Returning partners are excluded from the NPV calculation.

Sample calculation: NPV-2 (3Gen)

1,000 (your own NPV) + 7,000 (Teams 1+3) = 8,000. Teams 2 & 4 are not included for calculating the NPV-2 (3Gen).

Sample calculation: NPV-3 (3Gen)

1,000 (your own NPV) + 2,000 (Team 1) = 3,000. Teams 2, 3 & 4 are not included for calculating the NPV-3 (3Gen).

Depending on your Target Level and your generated NPV-2 (3Gen) or NPV-3 (3Gen), your Growth Bonus is between 2% and 5% of your TT. Your total TT minus the TT of team partners in your downline who have already reached Target Level 6 or higher themselves — and who therefore also have the opportunity to qualify for the Growth Bonus — is taken into account.

However, you will receive the difference in the Growth Bonuses for these team partners, i.e. the difference between your own Growth Bonus percentage and the Growth Bonus percentage of these RINGANA partners. It does not matter whether these partners have qualified for their Growth Bonus on the basis of their NPV-2 (3Gen) or NPV-3 (3Gen) — it's

only their Target Level that counts. The percentage differences are then multiplied by the TT of the respective team member and also contribute to your Growth Bonus.

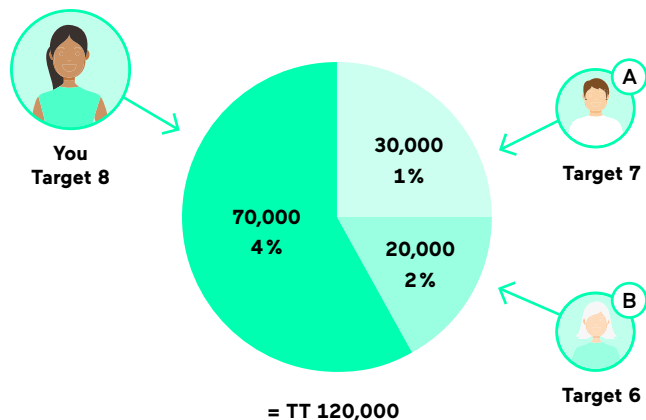

A precondition for the Growth Bonus is an NPV-2 (3Gen) of at least 3,500 and a Target Level of 6 or 7 or an NPV-3 (3Gen) of at least 3,500 and a Target Level of 8–10.*

* If you qualify for Target Level 8, 9 or 10 but do not reach the NPV-3 (3Gen) of 3,500, a check is made to see whether an NPV-2 (3Gen) of 3,500 has been reached. If this is the case, the Growth Bonus is calculated on the basis of Target Level 7 (3%). To calculate the Growth Bonus difference of partners in your upline, the Growth Bonus percentage value of your actual Target Level qualification is still used and not the one from Target Level 7.

GROWTH BONUS

Example calculation

You are at Target Level 8 and have already built up a solid team that is very active, allowing you to generate a total TT of 120,000. With an NPV-3 (3Gen) of 3,800, you have also qualified for a Growth Bonus of 4%.

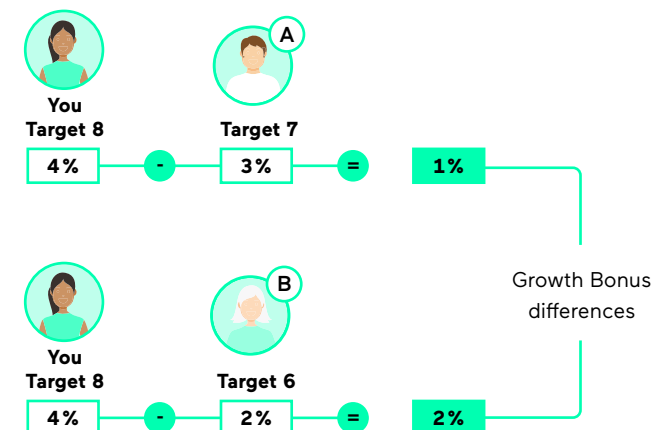

In addition to you, two of your team members are already at Target Level 6 or higher. Subtracting their TT results in a TT of 70,000, which serves as the basis for calculating your Growth Bonus.

One of the two strong team members is at Target Level 7, already has TT of 30,000 and, with an NPV-2 (3Gen) of 3,600, has also qualified for a Growth Bonus of 3%. This results in a difference of 1%, which is multiplied by their team turnover to calculate your Growth Bonus.

The other team member has already reached Target Level 6 and a TT of 20,000, but could not qualify for the Growth Bonus even with an NPV-2 (3Gen) of 3,200. Nevertheless, this

partner will be taken into account when calculating your Growth Bonus.

Deducting the Growth Bonus percentage of 2%, which is assigned to Target Level 6, from your Growth Bonus results in a difference of 2%. This is then multiplied by the TT of this RINGANA partner. This results in a total Growth Bonus of 3,500 commission points.

$70,000 \times 4\%$	=	2,800	points
$30,000 \times 1\%$	=	300	points
$20,000 \times 2\%$	=	400	points
Additional points	=	3,500	points
$\times$ points factor 1.6*			
Growth bonus in euros		\$ 5,600	

* Please note that the points factor may vary from country to country.

● BEYOND TARGET 10 BONUS

This bonus is for all RINGANA partners who have already reached Target Level 10, the highest level of the RINGANA compensation plan, because your journey is not over at this point. The Beyond Target 10 Bonus rewards you if you continue to drive your business forward and lead a solid team that is constantly growing and active. This bonus is paid in addition to the regular commission according to the RINGANA compensation plan and is divided into three development paths — Team Focus, Driving Growth and

Master with different qualification criteria with respect to TT-5 and NPV-5 (3Gen). If you satisfy the requirements, you will receive the bonus, which is calculated based on a percentage of your attained TT-5 and NPV-5 (3Gen). This varies depending on which development path you follow.*

* The Beyond Target 10 Bonus is newly calculated for each statement month and only paid out for one of the three development paths — for example, if you meet the requirements for Team Focus AND Driving Growth, you will only receive the bonus once.

	Team Focus	Driving Growth	Master
Requirement 1: TT-5	min. 100,000 points	min. 25,000 points	min. 200,000 points
Requirement 2: NPV-5 (3Gen)	min. 10,000 points	min. 25,000 points	min. 50,000 points
BONUS	2% of total TT-5 + 20% of total NPV-5 (3Gen)		4% of total TT-5 + 40% of total NPV-5 (3Gen)

NPV-5 (3GEN) AND TT-5 Calculation

The NPV-5 (3Gen) is the sum of your own NPV plus the NPV of your team partners minus your five strongest teams when it comes to NPV. The first three generations are then used for the calculation. TT-5 is the sum of your own DT plus the total DT of your team members minus the DT of your five strongest teams.

● BEYOND TARGET 10 BONUS

Example calculation

You are at Target Level 10 and achieve TT-5 of 71,000 and an NPV-5 of 25,100. As such, you meet the requirements for the Driving Growth development path and qualify for a Beyond Target 10 Bonus, which is 2% of your TT-5 and 20% of your NPV-5 (3Gen).

71,000 × 2%	=	1,420	points
25,100 × 20%	=	5,020	points
Total	=	6,440	points
× points factor 1.6*			
Beyond Target 10 Bonus		\$ 10,304	

* Please note that the points factor may vary from country to country.

Commission settlement

● STATEMENT MONTH

When calculating your commission, the period between two settlements — the so-called statement month — is always taken into account. This period always corresponds exactly to one calendar month. All paid sales generated from the first day to the last day of the month are therefore included for the commission settlement.*

As a new RINGANA Partner, you will receive your first commission settlement after completing your first full statement month. This

means that if you register in January, for example, you will receive your first commission with the February statement (paid out mid-March), as this is your first full month as a RINGANA Partner.

Returning partners, on the other hand, will receive their settlement straight away in the first statement month. So if you have already registered as a RINGANA Partner and register again in January, you will receive your first commission with the January statement

RINGANA GLOSSARY

RETURNING PARTNERS

RINGANA partners who have already been registered in the database as RINGANA partners at least once and who are registering as RINGANA partners once again.

* The statement month always ends on the last day of the month at 23:59 CET. Please note that only sales that have been paid by this time can be taken into account for the commission settlement for the respective month. The decisive factor here is the receipt of payment by RINGANA. In order for sales to be taken into account in the case of payment by bank transfer, they must be made by 16:00 CET on the last working day of the month, stating the correct purpose of payment. Due to internal bank processing times, this is the only way to ensure that the payment can still be allocated to the respective statement month. In some cases, bank processing times may be longer, which is beyond our control.

Late transfers may result in delays or allocation to the following statement month. The billing dates are valid according to Central European Time (CET). If you live outside this time zone, you must take the time difference into account yourself.

● COMMISSION PAYMENT

At the end of a statement month, the number of points you have earned based on your direct turnover and your team's direct turnover is calculated and your total number of points is converted into your commission using the points factor. Your additional earnings from the bonus programmes are, of course, also taken into account. If you are entitled to a commission, it will be transferred to your bank account no later than the 14th of the following month, once the settlement has been completed. In this example, the January commission would be transferred to your bank account by 14th February at the latest.

In addition to the final commission payment at the end of a statement month, there is also the so-called **Interim Payment**. This is an advance payment of your direct turnover commission, which is usually processed in the middle of the month. While the final commission settlement takes into account all commission components (direct turnover commission, team turnover commission and

all relevant bonuses), the Interim Payment is calculated solely on the basis of your direct turnover. Your team turnover or any bonuses are therefore not yet included here. The cut-off date for calculating the Interim Payment is always the 15th of the month. The number of points generated from your direct turnover up to this date is determined. In addition, your current target level is reviewed. This is used to determine the appropriate percentage for the direct turnover commission and thus calculate the number of your commission points. These points are then multiplied by the defined points factor to determine the amount of your Interim Payment. The Interim Payment is paid out within 14 days, so that, for example, the Interim Payment for January is paid out by 29th January at the latest.

* There is no legal entitlement to the Interim Payment. For individual Partners, advance payment in the form of Interim Payments may be excluded. For Partners with a billing address in the United States, Interim Payments will be available starting January 2027.

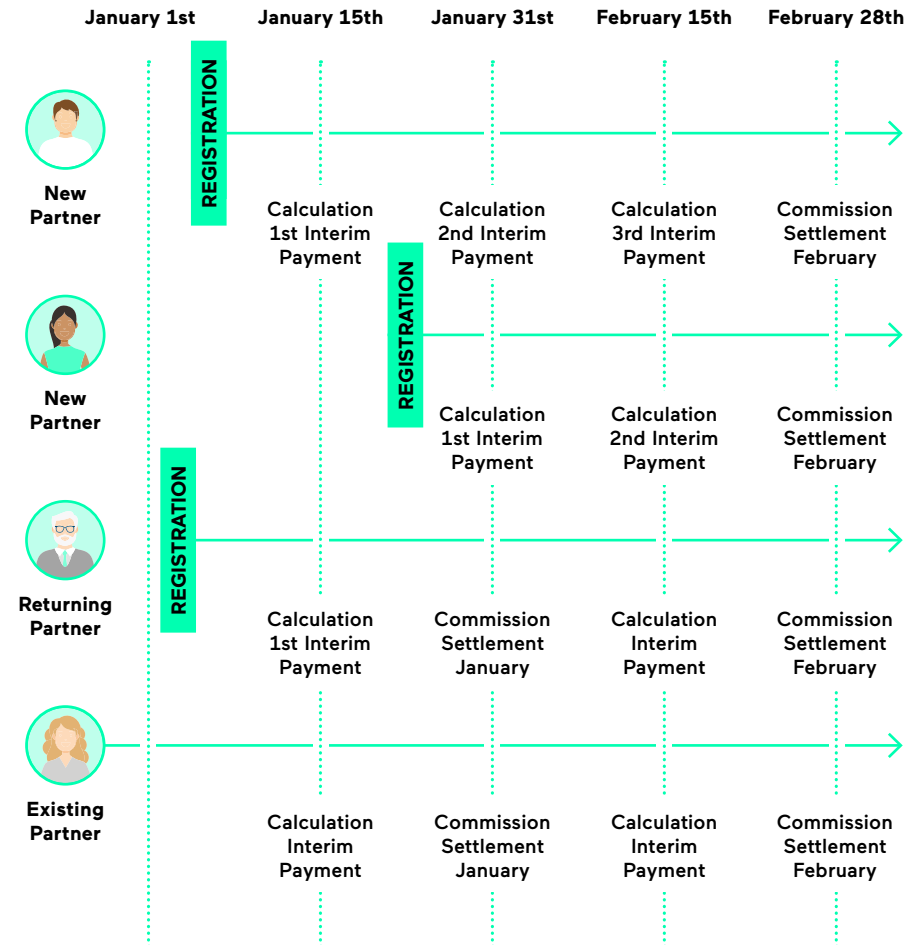

Calculation of Interim Payment

DT commission	DT in points achieved by the cut-off date for the Interim Payment x DT-commission rate (depending on the Target Level achieved at the time of Interim Payment)
× defined points factor	1.6**
= Interim Payment	

**Points factor: 1 point equates to a value of \$ 1.6. These points values are valid from October 2026 until further notice. Please note that the points factor may vary from country to country. You can find information on the points factors for other RINGANA markets in the market-specific RINGANA commission guidelines.

New Partners may also receive an Interim Payment at the end of their first calendar month as a RINGANA Partner. As no final settlement is carried out at this stage, an Interim Payment is made that includes all direct turnover generated up to the last day

of the first calendar month. In this case, the cut-off date is the last day of the month. Depending on your registration date as a RINGANA Partner, you may receive up to three Interim Payments during your first statement month.

INTERIM PAYMENT Example 1

If you register as a RINGANA Partner on the 5th of January, your first final commission settlement will not be issued until the end of the February statement month. However, you can receive one Interim Payment in mid-January, one at the end of January and one in mid-February.

INTERIM PAYMENT Example 2

If you register as a RINGANA Partner on the 21st of January, your first final commission settlement will also be issued at the end of the February statement month. However, you can receive one Interim Payment at the end of January and one in mid-February.

In the final commission settlement at the end of a statement month, the commission for the entire statement month is calculated, including all components (direct turnover commission, team turnover commission and all relevant bonuses). Before the payment is made, any Interim Payment that you have already received in advance is deducted. For new Partners who have received several Interim Payments during their first statement month, all payments are deducted. In rare cases, such as when orders are cancelled, a negative commission may result after

deduction of the Interim Payment as part of the final commission settlement. The corresponding amount will then be carried over to the following months and offset against future commission claims. If an Interim Payment is less than \$ 5, it will not be paid out but will be carried over to the next calculation, regardless of whether this is the final commission settlement or another Interim Payment.

This is how your commission including bonuses is made up

DT commission	DT in points × DT-commission rate (depending on the Target Level reached)
+ TT commission	Sum of the DT (in points) of your individual team partners (max. up to generation 9) × percentage of the respective generation
+ Growth bonus	Additional bonus from Target Level 6 if the criteria are met
+ Beyond Target 10 Bonus	Additional bonus from Target Level 10 if the criteria are met
= Total of all points	Basis for commission conversion
× defined points factor	1.6*
= Sum of commission	
+ Bonus	Cash bonus if criteria are met**
- Interim Payment(s)	Total direct turnover commission already paid in advance
= Total commission in local currency	

* Points factor: 1 point equates to a value of \$ 1.6. This points factor is valid from October 2026 until further notice. Please note that the points factor may vary from country to country. You can find information on the points factors for other RINGANA markets in the market-specific RINGANA commission guidelines.

** Includes Start Bonus and any other applicable cash bonus payments.

In summary: After each completed statement month, you will receive your final commission for that month, including all components (direct turnover commission, team turnover commission and all relevant bonuses). In advance, you will receive one (or, in the case of new Partners, several) advance payments, known as Interim Payments, which are calculated solely on the basis of direct turnover.

Commissions and Interim Payments over \$ 50 will be transferred directly to your registered bank account. Otherwise, you will receive them in the form of a product voucher code, which you will find on your respective commission document.* Please note that in the event of violations, commission payments may be reduced. You can find more information on this in the GC Rules. To ensure that your commission can be paid on time, please make sure that your payment information is complete and valid in advance.

ACH Form: Complete your ACH form under My Account > My Data on ringana.us before the payment period. A valid ACH form is required to process commission payments.

Form W-9: Submit your Form W-9 under My Account > My Data on ringana.us. A valid W-9 with a verified TIN is required once your annual commissions reach the IRS reporting threshold. We recommend submitting it in advance to avoid payment delays.

* Valid until further notice. This voucher can be redeemed within three years of issue, when placing an order in the RINGANA webshop at ringana.us. The voucher cannot be redeemed in cash, is non-transferable and cannot be used on orders that have already been completed.

RINGANA GLOSSARY

GC RULES

The RINGANA Governance & Communication Rules — in short GC rules — are our rules of conduct and communication for all RINGANA partners. You will find them in your Online-Office under Downloads.

● COMMISSION ENTITLEMENT

You must be an active RINGANA Partner in order to be entitled to commission. Your status is “active” if you have reached at least target level 1 (110 points in direct turnover) in the respective statement month. The prerequisite for an Interim Payment is also that you have already achieved at least 110 points in direct turnover by the respective cut-off date (15th or last day of the month). If you remain

inactive for 12 months (i.e. you do not receive any commission), RINGANA is entitled to terminate your RINGANA Partner contract with immediate effect and downgrade you to customer status. This applies in particular if you do not generate any customer turnover.

● COMMISSION DOCUMENTS

As soon as the commission settlement is complete, the commission documents for the respective statement month are available in your customer account by the 7th of the following month at the latest. You will receive two documents following each settlement: your Personal Report and your Billing Document. Both documents are also provided for the Interim Payment and are available in your customer account by the 19th of the same month.

Your Personal Report will contain an overview of your personal details and information about the target level you reached in the respective statement month. It will also include the most important commission-relevant figures for the respective statement month. These include direct turnover, team turnover and the different team turnover variants, as well as the new partner volume and their variants. Finally, the report will also inform you whether you were able to achieve the activity status in the respective statement month. The Personal Report you receive for the Interim Payment shows the target level you have reached up to the 15th of the month. The document also displays the direct turnover points generated by that date, which are taken into account for the Interim Payment calculation.

In your Billing Document, you will find a list of all direct turnovers in the respective statement month as well as a list of your team members and the direct turnovers they generated in the respective statement month. You can see directly here which generation the respective team member is in and what percentage of their direct turnover commission you will receive. If you succeeded in qualifying for a bonus in the respective statement month, you will also find this in your Billing Document. Finally, you will receive an overview of your total commission points earned and the conversion into your final commission for the respective statement month using the respective points factor. The Billing Document that you receive for the Interim Payment is structured in exactly the same way. However, it only lists the direct turnover and shows the calculation of the Interim Payment based on these.
